Pay your team back at home or around the world.

**Corporate cards**  
Assign, manage, and reconcile cards in one place.

**Sage Intacct integration**  
Our two-way sync keeps expense data updated in realtime.

# Seamlessly *integrate* with Sage Intacct.

Cut through the clutter with Expensify's Sage Intacct expense management integration — a one-stop shop for streamlined expense reporting and financial management.

Scan this QR code to learn more about Expensify's Sage Intacct integration.

## **Sage Intacct dimensions sync**

Integrate with Sage Intacct's core dimensions, including expense types, departments, classes, locations, customers, projects, and User Defined Dimensions for a truly tailored experience.

## **Natively support Sage Intacct Tax**

Directly pull in all tax rates from each international Sage Intacct entity and export the tax rates at the line item level for a true global solution for all Sage Intacct customers.

## **Auto-sync for realtime visibility**

No need to provision two systems as Expensify's auto-sync updates any changes to your expense types or native dimensions immediately. Simultaneously, all final approved reports are exported back to Sage Intacct, removing manual admin overhead.

## **Auto-reconcile Expensify Card transactions**

In one automatic sync, Expensify will create the liability account and Journal Entry to balance out the payment of your monthly transactions, saving admins hours reconciling their statements at the end of each month.

## **Direct corporate card integrations**

Expensify has native integrations with all major corporate providers which download transactions directly into member accounts and auto-merge them with receipt images that are submitted at the point of sale.
